SAMPLE KIT

SAM – A BAG TO HOLD IT ALL

We are pleased to introduce Domani's covetable taupe bag, handcrafted from tactile suede.

Sturdy yet supple, this spacious bag contains a sample set of Domani's full range of available colours and finishes, the lookbook, a copy of the L catalog and the price list. The samples come in a roll-up bag for safekeeping, which is securely fastened with thin leather straps on the outside.

TECHNICAL INFORMATION

All Domani items are handmade in our own European artisan workshop.

FROST-PROOF

All our terracotta and zinc collections have a drainage hole and are frost-proof.* Please note that some shapes need more care if they are planted and placed outside.

* Atlantis TAOP60 and TAOP80 in bronze and black metallic are made without drainage holes.

RUBBER FEET

All outdoor pots are delivered with rubber feet.

DIMENSIONS

∅ This is the outside diameter of the pot.

↑↓ This is the total height of the pot, from top to bottom.

Please note that dimensions may vary due to natural shrinkage.

MATERIAL INFORMATION

TERRACOTTA

For many millennia, terracotta has been used to create beautiful objects of art and earthenware. Indeed, the earliest examples of its use have been traced back to prehistoric times. While always maintaining its typical colour, which ranges over different hues of reddish-brown depending on the iron content, our terracotta clay is made using a kaolin base with properties that virtually eliminate water absorption. This ensures that a Domani terracotta pot is frost-proof, lending itself to year-round use in any climate.

CORTEN STEEL

Domani's corten steel vessels are slowly brought to life as the seasons pass, shifting gradually from steel grey to orange, then dark red and finally deep dark brown. The weather resistance of corten steel is caused by oxidation that protects the base material against further attacks from the elements. The process takes months, or even years, which is why all corten steel that we use in our manufacturing process has been treated to achieve approximately one year of natural ageing. The outcome is a steel structure that can be used outside for decades to come.

ZINC

Our admiration for zinc stems from its natural beauty. When zinc is exposed to humidity, natural oxidation occurs and it forms its own protective armour. As time passes, nature and the environment slowly adorn zinc with a unique and ever-evolving patina. The zinc used for Domani's pots contains titanium, which adds to its inherent high resistance to corrosion. This unique composition ensures that our zinc products have the ability to self-heal.
